

Corporate Overview

Lomont IMT, a product of Lomont Molding, Inc., features the next generation of safety signage and identification products that is revolutionizing the safety marking industry. In-Mold technology utilizes robotics and a patent pending method that capitalizes on the advanced properties of plastic materials in the molding process.

Paragon Products, a division of Lomont Molding, Inc., specializes in concrete accessories. Our high quality rebar accessories are used in commercial, highway, and pre-cast construction markets.

Lomont Molding, Inc. is one of the premier plastic molders in the country. Founded in 1982, Lomont Molding, Inc. operates 24 hours a day, seven days a week. We take great pride in helping our customers create opportunities and finding solutions to their problems. Lomont has over 150 dedicated employees who strive for constant innovation, quality management, and cutting edge technology.
